

HOME PRICE GAINS IN JUNE CONCENTRATED IN SOUTH AND WEST ACCORDING TO THE S&P CORELOGIC CASE-SHILLER INDICES

NEW YORK, August 30, 2016 – S&P Dow Jones Indices today released the latest results for the S&P CoreLogic Case-Shiller Indices, the leading measure of U.S. home prices. Data released today for June 2016 shows that home prices continued their rise across the country over the last 12 months. More than 27 years of history for these data series is available, and can be accessed in full by going to www.homeprice.spdji.com. Additional content on the housing market can also be found on S&P Dow Jones Indices' housing blog: www.housingviews.com.

YEAR-OVER-YEAR

The S&P CoreLogic Case-Shiller U.S. National Home Price NSA Index, covering all nine U.S. census divisions, reported a 5.1% annual gain in June, unchanged from last month. The 10-City Composite posted a 4.3% annual increase, down from 4.4% the previous month. The 20-City Composite reported a year-over-year gain of 5.1%, down from 5.3% in May.

Portland, Seattle, and Denver reported the highest year-over-year gains among the 20 cities over each of the last five months. In June, Portland led the way with a 12.6% year-over-year price increase, followed by Seattle at 11.0%, and Denver with a 9.2% increase. Six cities reported greater price increases in the year ending June 2016 versus the year ending May 2016.

MONTH-OVER-MONTH

Before seasonal adjustment, the National Index posted a month-over-month gain of 1.0% while both the 10-City Composite and the 20-City Composite posted a 0.8% increase in June. After seasonal adjustment, the National Index recorded a 0.2% month-over-month increase, and both the 10-City Composite and 20-City Composite posted 0.1% month-over-month decreases. After seasonal adjustment, nine cities saw prices rise, two cities were unchanged, and nine cities experienced negative monthly price changes.

ANALYSIS

“Home prices continued to rise across the country led by the west and the south,” says David M. Blitzer, Managing Director and Chairman of the Index Committee at S&P Dow Jones Indices. “In the strongest region, the Pacific Northwest, prices are rising at more than 10%; in the slower Northeast, prices are climbing a bit faster than inflation. Nationally, home prices have risen at a consistent 4.8% annual pace over the last two years without showing any signs of slowing.

“Overall, residential real estate and housing is in good shape. Sales of existing homes are at running at about 5.5 million units annually with inventory levels under five months, indicating a fairly tight market. Sales of new single family homes were at a 654,000 seasonally adjusted annual rate in July, the highest rate since November 2007. Housing starts in July topped an annual rate of 1.2 million

units. While the real estate sector and consumer spending are contributing to economic growth, business capital spending continues to show weakness.”

SUPPORTING DATA

The chart below depicts the annual returns of the U.S. National, the 10-City Composite, and the 20-City Composite Home Price Indices. The S&P CoreLogic Case-Shiller U.S. National Home Price NSA Index, which covers all nine U.S. census divisions, recorded a 5.1% annual gain in June 2016. The 10-City and 20-City Composites reported year-over-year increases of 4.3% and 5.1%.

The following chart shows the index levels for the U.S. National, 10-City and 20-City Composite Indices. As of June 2016, average home prices for the MSAs within the 10-City and 20-City Composites are back to their winter 2007 levels.

The S&P CoreLogic Case-Shiller Indices are published on the last Tuesday of each month at 9:00 am ET. They are constructed to accurately track the price path of typical single-family homes located in each metropolitan area provided. Each index combines matched price pairs for thousands of individual houses from the available universe of arms-length sales data. The S&P CoreLogic Case-Shiller U.S. National Home Price Index tracks the value of single-family housing within the United States. The index is a composite of single-family home price indices for the nine U.S. Census divisions and is calculated quarterly. The S&P CoreLogic Case-Shiller 10-City Composite Home Price Index is a value-weighted average of the 10 original metro area indices. The S&P CoreLogic Case-Shiller 20-City Composite Home Price Index is a value-weighted average of the 20 metro area indices. The indices have a base value of 100 in January 2000; thus, for example, a current index value of 150 translates to a 50% appreciation rate since January 2000 for a typical home located within the subject market.

These indices are generated and published under agreements between S&P Dow Jones Indices and CoreLogic, Inc.

The S&P CoreLogic Case-Shiller Indices are produced by CoreLogic, Inc. In addition to the S&P CoreLogic Case-Shiller Indices, CoreLogic also offers home price index sets covering thousands of zip codes, counties, metro areas, and state markets. The indices, published by S&P Dow Jones Indices, represent just a small subset of the broader data available through CoreLogic.
